

Assignment 1

You are required to build an HTML page that contains the following sections and elements. Use semantic tags appropriately (<header>, <nav>, <main>, <section>, <aside>, <footer>).

1. Page Header (<header>)

- A main heading (<h1>) that welcomes users.
- A paragraph (<p>) stating that the page uses all HTML elements.
- A horizontal line (<hr>).

2. Navigation Bar (<nav>)

- A heading (<h2>) for the navigation menu.
- An unordered list ()
 - Home
 - About Us
 - Contact Us
 - Gallery
 - Table
 - Registration Form

3. Main Content (<main>)

The main area must include the following sections:

a. Home Section (<section id="home">)

- A heading (<h2>) "Home".
- A paragraph with a <mark> element highlighting a welcome message.
- An <abbr> tag explaining "HTML".
- A <kbd> element showing a keyboard shortcut (e.g., Ctrl + F).

b. About Us Section (<section id="about">)

- A heading (<h2>) "About Us".
- A paragraph containing , , and <u> tags.
- A nested unordered list () showing:

- Main service (e.g., Website design)
 - Sub-service 1 (e.g., Front-end)
 - Sub-service 2 (e.g., Back-end)
- Two other services.

4. Aside Section (<aside>)

- A heading (<h3>) "Additional Information".
- A paragraph explaining semantic elements with <code> tags (e.g., <header>, <nav>).
- An ordered list () :
 - Text as title for list: "Quick Tips (click here)".
 - Inside details: two tips about SEO and HTML5 compatibility.

5. Footer (<footer>)

- A copyright notice using © (current year).
- A paragraph stating the author: "Created by Web Programming 1 Student".
- A <small> element showing the last updated date.

Constraints:

- Use only HTML (no CSS is required, but you may add basic inline styles if needed).
- Use comments in HTML file.
- All tags must be properly closed and nested.
- The page direction should be left-to-right (English).
- Do not copy the code directly; write it yourself to understand each tag.

Welcome to the Comprehensive Basic HTML Page

This page contains **all HTML elements** required in the Web Programming 1 curriculum

Navigation Menu

- Home
- About Us
- Contact Us
- Gallery
- Table
- Registration Form

Home

This is the main content of the home page. **Welcome to our website!** We offer you a comprehensive learning experience for all HTML elements.

You can use `Ctrl + F` to search within the page.

About Us

Here is some information about our company or organization. We offer *training courses* in **web programming** and next generation technologies.
